KEY RISKS

What are the key risks associated with this product?

| | |
|-------------------------------|--|
| Market risk | Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV. |
| Specific security risk | Prices of a particular security may fluctuate in response to the circumstances affecting individual companies. As such, adverse price movements of a particular security invested by the fund may adversely affect the fund's NAV and unit price. |
| Liquidity risk | Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavourable prices. |
| Currency risk | If the fund invests in assets denominated in foreign currency, the fund may be exposed to currency fluctuation risks. If the currencies in which the investments are denominated depreciate against the local currency, the fund's NAV may be adversely affected and vice versa. To mitigate such risk, the fund may undertake hedging strategies. However, the fund would not benefit from any potential upside if currencies move in the opposite direction of the hedging strategy. |

What are the key risks associated with this product? (cont'd)

| | |
|---|--|
| Country risk | Investments of the fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the country in which the fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the fund in those affected countries. This in turn may cause the NAV of the fund or prices of units to fall. |
| Risk of non-compliance with Shariah requirements | This risk refers to the risk that the currently held Shariah-compliant shares in the fund may be reclassified as Shariah non-compliant in the periodic review of the shares by the Shariah Advisory Council of the Securities Commission Malaysia, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, the Manager will take the necessary steps to dispose such shares. There may be opportunity loss to the fund due to the fund not being allowed to retain the excess capital gains derived from the disposal of the Shariah non-compliant shares. The value of the fund may also be adversely affected in the event of a disposal of Shariah non-compliant shares at a price lower than the investment cost. |

You are advised to read the fund's prospectus and understand the risks involved and, if necessary, consult your professional adviser(s) before investing.
